

PAIRING YOUR HEADSET USING ANDROID OS

Your Jarv NMotion Free Bluetooth Earbuds are True Wireless Earbuds and require that the earbuds be paired individually to your Bluetooth enabled device firstly and then configured to work together.

PAIRING THE EARBUDS TO YOUR BLUETOOTH ENABLED DEVICE USING ANDROID OS

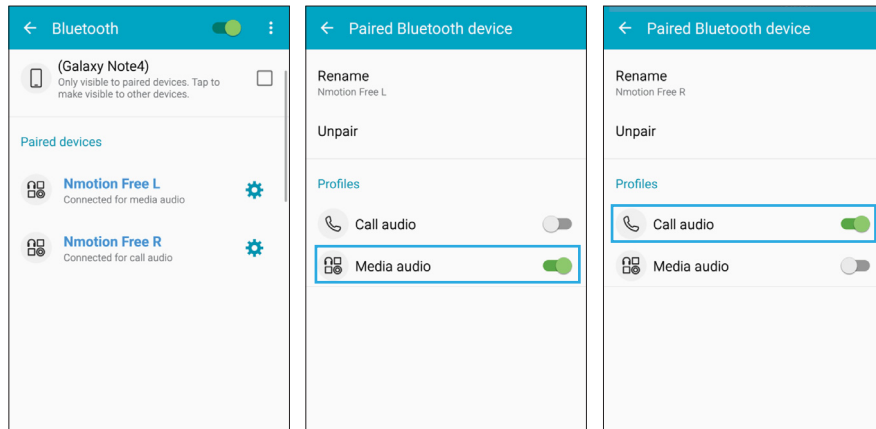

1. Begin with both earbuds being powered off and fully charged
2. Place the earbuds and the mobile phone where they are easily viewable and no more than 3ft. apart.
3. Press and hold down the Pairing button (multi-function button) for approximately 8-9 seconds until the red and blue LED light flash alternately which indicates that you are in Pairing Mode.
4. Activate your mobile phone's Bluetooth pairing function, set the mobile phone to search for Bluetooth devices within range and select "**NMotion Free L**" and "**NMotion Free R**"

*This process needs to be done separately for each earbud **BOTH** Left and Right

Once each earbud has successfully been paired to your device, the LED indicator will slowly flash Blue confirming your Bluetooth connection.

Please note: You must now configure the settings for each earbud separately in order to play music in stereo. (call audio will only play from one device or the other)

Proceed to Bluetooth settings for each earbud and set one to call audio and the other to media audio (see screen shot below)

NOTE: In the event that you cannot get the earbuds to pair properly, please delete the devices from your Bluetooth connection and begin at Step 1.
